Professional Profile

Final-year Bachelor of Science in Information Technology student at North-West University with practical experience in Python programming, database management, data analysis, and decision-support concepts. Skilled in transforming data into meaningful insights through analytical thinking, programming, and visualization techniques. Experienced in developing database solutions using Oracle SQL Developer and creating technology projects using modern development tools. Seeking a Data Analyst internship opportunity to apply technical skills and contribute to data-driven decision-making.

Education

North-West University (NWU)

Bachelor of Science in Information Technology

Final Year

Relevant Coursework

- Decision Support Systems
 - Database Systems
 - Computer Networks
 - Artificial Intelligence
 - Systems Analysis and Design
 - Object-Oriented Programming
 - Programming Fundamentals
-

Technical Skills

Data Analytics & Business Intelligence

- Data Analysis
- Data Cleaning and Preparation
- Data Visualization
- Business Intelligence Concepts
- Decision Support Systems
- Analytical Problem Solving
- Microsoft Excel
- Power BI (Learning)
- SQL Query Development

Programming Languages

- Python (Pandas, NumPy)
- Java
- JavaScript
- HTML5
- CSS3

Databases & Development Tools

- Oracle SQL Developer
- Relational Database Design
- SQL Queries
- Database Normalization (1NF, 2NF, 3NF)
- Git & GitHub
- Visual Studio Code

Academic Projects

Virtual CV & Portfolio Website

Technologies: HTML, CSS, JavaScript, GitHub Pages

- Designed and developed a responsive personal portfolio website to showcase technical skills, projects, and professional background.
 - Implemented website structure, styling, and interactive features using front-end technologies.
 - Managed version control and deployment using GitHub and GitHub Pages.
-

Database Management System Project

Technologies: Oracle SQL Developer

- Designed and implemented a relational database management system.
 - Created database tables, relationships, views, indexes, and triggers.
 - Applied database normalization principles including 1NF, 2NF, and 3NF.
 - Developed SQL queries for data retrieval, reporting, and database management.
 - Improved understanding of structured data storage and database design principles.
-

Decision Support Systems Coursework

- Applied analytical approaches to support decision-making processes.
 - Worked with optimization models and problem-solving techniques.
 - Developed skills in interpreting data to support business decisions.
-

Professional Development

- Python for Data Analysis (In Progress)
 - SQL for Data Analytics (In Progress)
 - Git & GitHub Version Control
-

Soft Skills

- Analytical Thinking
 - Problem Solving
 - Communication Skills
 - Team Collaboration
 - Attention to Detail
 - Adaptability
 - Time Management
-

Technical Interests

- Data Analytics
- Business Intelligence
- Data Visualization
- Database Management

- Artificial Intelligence Applications
-
