PROFESSIONAL PROFILE

Final-stage Bachelor of Science in Information Technology student at North-West University with practical experience developing full-stack applications, REST APIs, database-driven systems and business intelligence solutions.

Experienced with C#, Java, Python, .NET MAUI, ASP.NET Core Web API, Entity Framework Core, MySQL and SQL Server. Developed projects in personal finance and budgeting, employee work tracking and business intelligence, and online marketplaces.

Strong foundation in object-oriented programming, database development, system analysis and design, data structures and algorithms, computer networks, information security and software problem solving. Seeking a graduate or junior software development opportunity where I can apply my technical skills, gain professional experience and contribute to real-world software solutions.

TECHNICAL SKILLS

Programming: C#, Java, Python, SQL

Development: .NET MAUI, ASP.NET Core Web API, XAML, Object-Oriented Programming, REST APIs

Databases: MySQL, SQL Server, Entity Framework Core, Relational Database Design

Tools: Visual Studio, Visual Studio Code, Git, GitHub, BlueJ

Data & Reporting: Microsoft Excel, Data Cleaning, Data Analysis, Reporting, Business Intelligence

IT Knowledge: Data Structures & Algorithms, System Analysis & Design, Information Security, Computer Networks, Operating Systems, Artificial Intelligence, Decision Support Systems

PROJECTS

Martin SpendWise — Personal Finance, Budgeting & Grocery Management Application

Technologies: C#, .NET MAUI, ASP.NET Core Web API, Entity Framework Core, MySQL, XAML, JWT

- Developed a full-stack personal finance application with a .NET MAUI frontend, ASP.NET Core REST API and MySQL database.
- Implemented user registration, login, JWT authentication, secure password recovery and profile management.
- Built monthly budgeting, transaction tracking, spending summaries, reports, financial insights and grocery-list management.
- Implemented grocery budget checking and purchase recording that updates spending history.
- Built retailer price-comparison infrastructure for South African grocery retailers with verified-price handling.
- Used Entity Framework Core migrations, relational database modelling, validation, authorization, API integration and debugging.

InsightFlow — Employee Work Tracking & Business Intelligence System

- Developed an internal business intelligence system for company employees, administrators and management.
- Enables employees to capture daily work activities, completed items, business value, status, impact, reference numbers and notes.
- Associates submitted operational records with the relevant employee and department.
- Enables management to analyse employee activity, departmental performance, completed work and business value.
- Provides reporting and analytics across customers, products/services and organisational performance.
- Supports trend analysis and forecasting to assist management decision-making.

Campus Market — Student Marketplace Application

- Developed a student-focused marketplace for advertising, searching, buying and selling products within a campus environment.
- Implemented user registration and account functionality.
- Developed product listings, product categories and search functionality.
- Built category-specific product browsing and buyer-facing marketplace functionality.
- Implemented administrative functionality for managing the platform.

EDUCATION

Bachelor of Science in Information Technology (NQF Level 7)

North-West University (NWU), Vanderbijlpark Campus

2023 – Present

Final-stage BSc Information Technology student with an outstanding academic assessment scheduled for January 2027.

Available for employment from November 2026.

ADDITIONAL ACADEMIC EXPERIENCE

Object-Oriented Programming: Developed Java applications using object-oriented programming principles, classes, file handling, sorting and serialization.

Database & Systems Design: Designed relational database structures including tables, primary and foreign keys, relationships, constraints and referential-integrity rules. Created ERDs, DFDs, class diagrams and process models.

Data & Business Intelligence: Worked with Excel data cleaning and reporting, data warehousing, fact tables, dimensions, star and snowflake schemas, OLAP, drill-down and roll-up concepts.

Artificial Intelligence & Algorithms: Worked with Breadth-First Search (BFS), Depth-First Search (DFS), Iterative Deepening, Uniform-Cost Search, Greedy Search and A* Search, as well as propositional and first-order logic.

Computer Networks: Worked with networking concepts including communication protocols, framing, CSMA protocols and network communication.

Operating Systems: Studied operating-system processes, scheduling, context switching, memory management, paging, segmentation, file systems, I/O and disk management.

STRENGTHS

Problem Solving | Analytical Thinking | Communication | Teamwork | Dependability | Attention to Detail | Time Management | Adaptability | Willingness to Learn
